# GLOBAL WARMING

Increase in the average global temperature of the atmosphere near earth's surface is termed as **Global warming**.

# CAUSES OF GLOBAL WARMING

- Transportation
- Power Plants
- Green house gases
- Deforestation

# GREEN HOUSE GASES

Carbon  
dioxide

Methane

Nitrous oxide

# EFFECT OF GLOBAL WARMING

- Rise in sea level
- Drought
- Volcanic eruption
- Forest fire
- Climate change
- Wildlife effects
- Human life
- others

# Rise in sea level

Global warming decrease rain fall causing Drought

As the temperature rise up, volcanic eruption  
increase frequently

# EFFECT OF HUMAN LIFE

- ⊠ Infectious diseases will increased.
- ⊠ Availability of fresh and drinking water affected.
- ⊠ Weather pattern i.e. Drought, hurricans, floods and the humans suffered
- ⊠ Humans are depend for food on agricluture but die to increase temperature, its also affect.

# OTHERS EFFECT

- ⊠ Growth of plants will reduced
- ⊠ Growth of pests will increased
- ⊠ Evaporation will take place due to increase in temperature which lead to shortage of water.
- ⊠ Microbial degradation of organic matter takes place due to increase in temperature which increase level of CO<sub>2</sub>

# WE CAN SAVE OUR ENVIRONMENT BY USING SIMPLE THINGS AS:

- Should use the paper bags instead of plastic because plastic is harmful for environment.

<https://images.app.goo.gl/3x2hUQUYPGoUar7C9>

- Should walk or use bicycle for short distance instead of bike, scooter and car.

Should reused the things i.e. cold drink bottle can be used in plantation

By recycling the things i.e. the waste paper into new paper

Reuse the things i.e. waste things are used in making decorative items

- Use alternative source of energy i.e. Solar energy.
- Turn off the laptop, Television, radio when you are not using them.
- When you are leaving room switch off light and fan.
- Turn off the tap when your are not using water.
- Reuse the pill of vegetable and fruits in organic manure.
- Plant your own tree and motivate to others
